Deadline for manuscript  
submissions:

**closed (28 February 2021)**

### Message from the Guest Editor

Intermetallics have a wealth of interesting fundamental and novel functional properties. They often have desirable phase transition, magnetic, and superconducting behaviors, and their physical properties can be tailored by controlling either or both chemistry and structure. Therefore, intermetallics remain an intriguing subject for materials science and condensed matter physics communities. Some example includes shape memory alloys, permanent magnets, as well as caloric and hydrogen storage materials. This Special Issue aims to cover the latest research and development related to the magnetism, transport, and thermodynamic properties of intermetallic compounds. This includes theory and modeling, synthesis and characterization, microstructure and structure–property relationships, phase transitions, and their related physical properties and crystal structures of intermetallic compounds.

## Editor-in-Chief

### Prof. Dr. Hugo F. Lopez

Department of Materials Science  
and Engineering, College of  
Engineering & Applied Science,  
University of Wisconsin-  
Milwaukee, 3200 N. Cramer  
Street, Milwaukee, WI 53211, USA

## Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPlus / SciFinder](#), and many [other databases](#).

**Journal Rank:** [JCR - Q2 \(Metallurgy & Metallurgical Engineering\)](#) / [CiteScore - Q2 \(Metals and Alloys\)](#)
