

## New Processes and Machine Tools for Advanced Metal Alloys

Guest Editors:

**Prof. Dr. Luis Norberto López De Lacalle**

The Aeronautics Advanced Manufacturing Center-CFAA, 48170 Zamudio, Biscay, Spain

**Prof. Dr. Ainhoa Celaya**

Centre of Advanced Manufacturing Technologies for Aeronautics CFAA; Department of Mechanical Engineering, University of the Basque Country; EIB, Alameda de Urquijo s/n, 48013 Bilbao, Spain

Deadline for manuscript submissions:

**closed (25 May 2019)**

### Message from the Guest Editors

Dear Colleagues,

Advanced materials are crucial for the development of many industrial sectors such as aerospace, automotive, energy, etc. These materials show superior mechanical characteristics of strength, hardness, toughness, and durability in relation to conventional materials. However, these materials are also characterized by their complicated casting or forge and low machinability. In addition, the development of new advanced materials requires the use of advanced manufacturing technologies and rigid machine tools. New processes, new cooling systems, tools, and coatings must be investigated to enable the machining of these advanced materials. Machines that apply the processes can be also improved by introducing new components, control approaches, and monitoring and recording systems.

The aim of this Special Issue is to highlight recent advancements related to new processes and machine tools for machining advanced alloys. Machines, processes, assisted processes, and new tools are now in a rapid evolution.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
