Mechanical Engineering, Silesian
University of Technology, 7
Towarowa Street, 44-100 Gliwice,
Poland

Deadline for manuscript
submissions:

closed (30 November 2020)

Message from the Guest Editor

Dear Colleagues,

I invite you to submit your valuable articles to this Special Issue. Its scope is quite wide and covers all foundry issues, including casting alloys metallurgy, waste disposal, quality, and any other important area for foundry science and industrial practice. Obviously, as the title suggests, solidification and crystallization is the main topic. The issue covers all alloys: ferrous and nonferrous as well as pure metals. If you have any doubts regarding whether your topic is covered by the scope, please send me a short abstract. Feel free to invite your colleagues to send their submissions, too. Being extremely familiar with the *Metals* journal, I am certain this is a journal worth considering as a place for dissemination of your research results.

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)
