Message from the Guest Editors

Dear Colleagues,

The main aim of this Special Issue is to rapidly disseminate state-of-the-art fundamental and applied research that will have a positive impact on the design, analysis, and erection of steel infrastructure. Topics of interest include but are not limited to the following:

Area-1: Steel Structures

- Performance-based design or analysis criteria
- Life-cycle cost assessment and optimization
- Modeling of steel structures subjected to single or multiple hazards
- Innovative structural steel systems
- Novel connections and fastening systems

Area-2: Structural Steels

- The mechanical behavior of structural steels under blast, corrosion, fracture, fatigue, and fire
- Constitutive modeling of structural steels subjected to blast, corrosion, fracture, fatigue, and fire
- Applications of shape memory alloys and multiphase steels in construction
- Additive manufactured steels for construction
- The influence of nano- and microscale steel properties on the behavior of steel structures

Any other topic closely related to steel infrastructure will be considered for publication.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
