Special Issue

Machine Learning in Metal Additive Manufacturing

Message from the Guest Editors

We are excited to announce a call for research articles for a Special Issue focused on “Machine Learning in Metal Additive Manufacturing”. As the field of metal additive manufacturing (AM) continues to evolve, the integration of machine learning (ML) techniques is proving to be transformative, offering unprecedented opportunities to optimize processes, enable in situ quality audits and adaptive controls, improve part quality, and predict outcomes (e.g., microstructures, defects formation, mechanical properties) with increased precision, discover optimal material compositions for printing, optimize part designs, to name just a few categories. This Special Issue seeks to provide a comprehensive overview of the current state-of-the-art, offering insights into how the power of ML can be harnessed to push the boundaries of metal AM.

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez
Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang
Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
