Special Issue

Advance of Carbon Reinforced Metal-Matrix Composites

Message from the Guest Editors

With the development of metal-matrix composites (MMCs), carbonaceous reinforcements such as graphite particles, carbon nanotubes, graphene, SiC particles etc. have received increasing attention owing to their lower density, perfect elastic modulus and strength, good thermal conductivity, and excellent electrical properties. Simultaneously, the preparation technologies for MMCs are also developing—advanced equipment and technology are applied in powder metallurgy, semisolid forming, die casting, etc. Thus, the current Special Issue focuses on carbon-reinforced MMCs, including but not limited to advanced MMCs, preparation technology and performance.

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez
Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang
Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
