

## Special Issue

# Multiscale Computational and Experimental Research of Mechanical Properties and Microstructural Characterization of Metallic Materials

### Message from the Guest Editors

This Special Issue aims to integrate the latest research results of multiscale computational modeling and experimental methods in the mechanical properties and microstructure characterization of metal materials and provide a multiscale communication platform for researchers to promote academic discussion and scientific progress. In addition, the Special Issue also encourages contributions to research in the fields of advanced manufacturing processes, material defect evolution, interface behavior and high-performance alloy design, with a view to provide new ideas and directions for the development of metal materials science and engineering. This Special Issue pays special attention to the application of multiscale modeling in material design and performance prediction and emphasizes the systematic research from atomic scale to macro engineering application. At the same time, the Special Issue is also committed to promoting the innovation of experimental methods, such as high-resolution electron microscopy and in situ testing technology, in order to achieve a more accurate characterization of the relationship between the microstructure and properties of materials.

## About the Journal

### Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

---

### Editor-in-Chief

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering,  
State Key Laboratory for Advanced Metals and Materials, University of  
Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083,  
China

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei  
Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Metals and Alloys)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.7 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the second half of 2025).
