

Special Issue

Advances in Modeling and Simulation in Metal Forming

Message from the Guest Editors

Metal forming is one of the oldest technologies to manufacture products. Despite the vast knowledge and experience gained over the centuries, we are still striving to develop technology, machinery and equipment, and research methods and to learn about the phenomena accompanying the deformation of metals. In recent years, we have seen the rapid development of simulation and modeling techniques of metal-forming processes, which make it possible to perform multivariant analyses of complex problems quickly and relatively inexpensively. To meet this trend, the Editorial Board of the *Metals* journal is pleased to propose a Special Issue entitled “Advances in Modeling and Simulation in Metal Forming”, offering authors the opportunity to present the latest results in this area. As the , we invite you to contribute to this publication series, which we hope will be a source of knowledge not only for researchers, but also for practitioners. For this reason, we encourage you to submit original articles on the broadly understood subject of modeling and simulation of metal-forming processes.

About the Journal

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editor-in-Chief

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering,
State Key Laboratory for Advanced Metals and Materials, University of
Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083,
China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei
Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.7 days after
submission; acceptance to publication is undertaken in 2.7
days (median values for papers published in this journal in
the second half of 2025).
