

## Special Issue

# Recovery of Metals from Mine Tailings and Mineral Wastes/Residues by Hydrometallurgy

### Message from the Guest Editors

With the aim of sustainable development and the replenishment of metals from scarce non-primary resources, a relatively common practice is the extraction of metals like Co, Ni, Pt, Pd, Cu, Ag, Au, Ga, Ge, etc. from mine tailings (Zn, Cu, Al, Sn, Cr, U, etc.), and from mineral wastes generated post-processing (e.g., flotation tailings, pre-processed wastes, overburden, coal wastes, process rejects, waste rocks, slag, refuse/slimes, spent oil shales, etc.). The extraction of these metals and their associated elemental components by conventional processes is challenging due to the high associated cost, and thus it would be wiser to employ different combinations of preprocessing techniques before hydrometallurgical intervention. This Special Issue encourages submissions addressing topics within and beyond the above domain.

## About the Journal

### Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei  
Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Metals and Alloys)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.7 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the second half of 2025).
