

Special Issue

Electromagnetic Preparation of Metallic Materials

Message from the Guest Editors

The electromagnetic field as a contactless physical field can act on substances at different scales and the diversity of electromagnetic effects leads to the emergence of many new physical and chemical phenomena. Regarding metallic materials, many novel phenomena, such as thermoelectric magnetic effect, magnetic field-induced-diffusion, and magnetic orientation, have been discovered. The application of the electromagnetic field has become an important method to regulate the microstructure and mechanical properties of metallic materials. New progress of the electromagnetic preparation of metallic materials has been made recently. Therefore, the Special Issue is organized to present state-of-the-art research work on this topic and articles including but not limited to the following topics are welcome:

- Fundamentals of electromagnetic preparation
- Solidification processing; Heat treatment
- Flow simulation and modeling
- Particle removal/addition, stirring, braking, and vibration
- Electromagnetic shaping, mixing, and separation or levitation
- Recycling of metallic materials by the electromagnetic process
- New theories and techniques related to electromagnetic

Guest Editors

Prof. Dr. Chuanjun Li

School of Materials Science and Engineering, Shanghai University, Shanghai, China

Prof. Dr. Jun Wang

State Key Laboratory of Solidification Processing, Northwestern Polytechnical University, Xi'an 710072, China

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
