

## Special Issue

# Corrosion and Protection of Metallic Alloys

### Message from the Guest Editor

When metallic alloys make contact with a corrosive environment, corrosion will inevitably occur, which affects their performance and service life and sometimes causes safety accidents and significant economic losses. Therefore, it is of great theoretical and practical significance to study the corrosion behavior and mechanisms of metallic alloys and establish reliable protective measures, such as corrosion inhibitors and coating.

## About the Journal

### Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Metals and Alloys)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
