

Special Issue

Separation and Purification of Metals

Message from the Guest Editor

We are pleased to announce a Special Issue of *Metals* (ISSN 2075-4701) on “Separation and Purification of Metals”. In past decades, many attempts have been made to optimize the extraction, separation and purification of metals from abundant natural mineral or ore resources. With the rapid development of human industrialization, some metal and metal-based secondary resources can also be generated during successive material preparation, fabrication and application processes. These types of secondary resources with high-value metals also show great recovery potentials. However, clean extraction, separation, and purification of these metals, especially for rare metals with low or ultra-low concentrations, is extremely difficult. Currently, diverse processes for the separation and purification of metals from natural minerals or ores and from secondary resources are urgently needed. This Special Issue will contain articles reporting new and progressive research results as well as reviews on fundamental aspects in the study of the separation and purification of metals and their applications.

Guest Editor

Prof. Dr. Guihong Han

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
