Special Issue

Development of New Metallic Materials via Macrodesign of Microstructure

Message from the Guest Editors

This Special Issue aims to present a collection of articles of cutting-edge research on the “Development of New Metallic Materials Via Macrodesign of Microstructure by Means of Additive Manufacturing (AM)”, as regards improved property and performance, innovative technology, the micromechanics behind the microstructure evolution, even deformation and failure behavior. Through deep discussions and ongoing studies, the underlying microcosmic laws behind the marodesign of additive manufacturing will be better explored, which will of assistance to the additive manufacturing engineering of the materials for new properties and performances.

Original research articles and reviews with a focus on the following topics are welcome for submission.

- New metallic materials with advanced properties and performances fabricated by AM;
- Microstructures and/or mechanical response of materials produced by AM;
- State-of-the-art techniques on characterization of AM materials at multiscale;
- Theoretical and computational modeling of materials prepared by AM;
- Experimental, theoretical, and modeling studies on the structure design of metallic materials via AM processes.

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez
Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang
Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
