

Special Issue

Biomedical Applications of Metallic and Metal Oxide Nanoparticles

Message from the Guest Editor

In the last few years, nanosized metallic and metal oxide nanoparticles have attracted a great deal of attention in the medical field due to their potential to improve treatments. The main purpose of this Special Issue is to present the current progress and the impacts of metallic and metal oxide nanoparticles in the biomedical field. Additionally, this Special Issue aims to present an up-to-date overview regarding the pros and cons of current biomedical applications of metallic and metal oxide nanoparticles. This Special Issue will highlight recent progress related to the utility of metallic and metal oxide nanoparticles in drug targeting and delivery, cancer treatment, medical imaging and diagnosis, cosmetics, nanobiosensors and other bioapplications.

Guest Editor

Prof. Dr. Alexandru Mihai Grumezescu

Department of Science and Engineering of Oxide Materials and Nanomaterials, Faculty of Applied Chemistry and Materials Science, Politehnica University of Bucharest, RO-011061 Bucharest, Romania

About the Journal

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editor-in-Chief

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering,
State Key Laboratory for Advanced Metals and Materials, University of
Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083,
China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
