

# Special Issue

## Modern Aerospace Materials

### Message from the Guest Editor

Aerospace materials are a wide family, characterized by their applications under some of the most demanding mechanical, thermal, and thermo-mechanical service conditions. As such, their development has been accompanying technological breakthroughs along the last two centuries. Nowadays, current trends in the frame of the so-called “Industry 4.0 revolution”, as well as strict regulations to decrease the ecological footprint of aircrafts, together with new space travel technologies such as reusable entry vehicles are further pushing the development of metal-based aerospace materials and structures and their corresponding manufacturing methods. This Special Issue is devoted to disseminate scientific and technological efforts in this context and it is, therefore, my pleasure to invite you to submit contributions dealing with the processing and behavior under service-relevant conditions of metal-based aerospace materials.

### Guest Editor

Prof. Dr. Guillermo Requena

Department of Metallic Structures and Hybrid Materials Systems,  
Institute for Materials Research, German Aerospace Centre, Linder  
Höhe, 51147 Cologne, Germany

### Deadline for manuscript submissions

closed (15 April 2019)

## About the Journal

### Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei  
Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Metals and Alloys)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.7 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the second half of 2025).
