# Corrosion Protection for Metallic Materials

#### Message from the Guest Editors

Metallic materials are widely used in the petrochemical industry, automobile manufacturing, rail transit, aerospace and other fields. The corrosion resistance of metallic materials directly affects the service safety and service life of related structures and practices involving many metal structures such as welded components, additive parts, forging and pressing. Therefore, the corrosion protection of metallic materials is always a hot topic, and an area that requires further study. We invite researchers in relevant fields to submit both research papers and review articles. Potentil topics include:

- Processing of corrosion-resistant metallic materials, such as stainless steel/corrosion resistant aluminum alloy welding/additive manufacturing, and so on.
- Improvement of corrosion performance of metallic materials in all processing steps in the final analysis of microstructure and properties, such as corrosion resistant coating, laser surface process, and so on.

..... We encourage the publication of both research papers and review articles.

# About the Journal

## Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### Editors-in-Chief

#### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

#### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

### Author Benefits

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
