

## Special Issue

# Rare Earth Free Permanent Magnets

### Message from the Guest Editor

Permanent magnets (PMs) have become our invisible companions, particularly in electrical motors, hybrid and electric vehicles, (aero) generators, transformers, and all sorts of consumer electronics. High-performance rare-earth (RE) based magnets are nowadays facing a worldwide resource problem. With the considerable increase of RE price in the last decade, the Nd-Fe-B PMs have been classified as 'critical' materials in supply risk.

Therefore, a renewed interest in RE-free PMs resurfaced. Currently, several strategies to develop new, competitive RE-free PMs are put forward. One is to take advantage of Fe-Co soft magnetic alloy. Recent works focused on increasing its coercivity either by distorting the atomic structure via chemical substitution, strain or epitaxy, or by exploring composites where the added hard phase pins the soft phase at nanoscale.

Computational techniques, such as density functional theory, Monte Carlo and micromagnetism simulations, are also highlighted. We invite all researchers in the challenging area to contribute to the Special Issue "Rare Earth Free Permanent Magnets" in *Metals*.

## About the Journal

### Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Metals and Alloys)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
