

Special Issue

Superplasticity and Superplastic Forming

Message from the Guest Editor

This special issue is dedicated to latest findings on superplasticity and on superplastic forming. The coverage starts from new studies on the basic knowledge of the superplastic phenomenon in metal alloys and goes to the developments and enhancements of the forming process. New methodologies for the material characterization, for the design of the necessary tools, for the material constitutive modeling and for the numerical modeling of the process are also welcome. The goal is to collect a series of works that can summarize the latest trends in the field of superplasticity and superplastic forming. All experts, from material scientists to manufacturing technologists, are invited to contribute to delineating the future of both superplastic materials and the superplastic forming process by submitting their contribution.

Guest Editor

Prof. Dr. Donato Sorgente
School of Engineering, University of Basilicata, 85100 Potenza, Italy

Deadline for manuscript submissions

closed (31 December 2020)

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
