

## Special Issue

# Advances in Metal Additive Manufacturing: Materials, Technologies, Fabrication and Mechanical Properties

### Message from the Guest Editor

The 3D-printed components of metallic materials represent a significant and growing portion of additively manufactured parts in increasingly diverse fields such as the medical, aerospace and automotive industries. Different technologies used in metal additive manufacturing are available today, as classified by the energy source, the way the material is joined or the feedstock state. Depending on the additive manufacturing technology, feedstock quality, process parameters, etc., the micro- and macro-mechanical properties of 3D-printed parts can be affected. This Special Issue will collect contributions on the additive manufacturing techniques used for metallic materials, the effects of process parameters on the microstructural and mechanical properties of 3D-printed parts and post-processing techniques. Review articles and short communications are also of interest for this Special Issue.

### Guest Editor

Dr. Michela Simoncini

Department of Industrial Engineering and Mathematical Sciences,  
Università Politecnica delle Marche, Via Brecce Bianche 12, 60131  
Ancona, Italy

### Deadline for manuscript submissions

closed (30 October 2025)

## About the Journal

### Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### Editor-in-Chief

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering,  
State Key Laboratory for Advanced Metals and Materials, University of  
Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083,  
China

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei  
Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Metals and Alloys)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 18.7 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the second half of 2025).
