

## Special Issue

# Editorial Board Members' Collection Series: "Corrosion Protection and Prevention"

### Message from the Guest Editors

Corrosion not only threatens the safety of engineering but also causes huge economic losses. It has been reported that corrosion cost occupies about 3% of GDP, which explains why corrosion protection is attracting much attention from industry. Using available corrosion control practices, it is estimated that savings of between 15% and 35% of the cost of corrosion could be realized. In addition to the economic cost, corrosion failure may result in leakage, fire, and explosion accidents. Presently, there is a strong emphasis on the development of an advanced strategy for corrosion protection in different technological applications. The aim of this Special Issue is to provide the readership of *Metals* with the most up-to-date research in the corrosion and protection of materials. The topics of interest are related to corrosion behaviors and mechanisms of novel materials and novel protective coatings and methods. We welcome reviews and research articles.

## About the Journal

### Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Metals and Alloys)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
