

## Special Issue

# Forming and Heat Treatment of Modern Metallic Materials

### Message from the Guest Editors

This Special Issue is open to anyone who is familiar with the current state of metal forming and/or heat treatment technologies. Papers about conventional and non-conventional technologies of metal forming, rolling processes, production of tubes, forming of aluminum alloys and heating, as important elements of every heat molding process and in the protection of active parts of forming tools, are welcome. Hardening, tempering, and annealing, as well as standard procedures of heat treatment, without which it is not possible to perform any metal forming or heat treatment, and their irreplaceable roles are also of interest. Papers exploring mathematical and physical simulation introduced processes are also welcome.

### Guest Editors

Assoc. Prof. Ján Moravec

Department of Technological Engineering, Faculty of Mechanical Engineering, University of Žilina, Univerzitná 8215/1, 010 26 Žilina, Slovak Republic

Assoc. Prof. Karel Gryc

Environmental Research Department, Faculty of Technology, The Institute of Technology and Business in České Budějovice, Okružní 517/10, 370 01 České Budějovice, Czech Republic

### Deadline for manuscript submissions

closed (30 June 2020)

## About the Journal

### Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /  
CiteScore - Q1 (Metals and Alloys)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
