

Special Issue

Computational Methods in Manufacturing Processes

Message from the Guest Editors

“Computational Modeling in Manufacturing Processes” has been a very active field of research in the last few decades. Significant advances in this field have been the result of interdisciplinary multi-physics and multiscale research in related fields of computational mechanics, constitutive material models, and mathematical analysis. Additionally, during this period, industry has shown a growing interest in incorporating numerical techniques as a valuable tool for design and process optimization. Topics addressed in this Special Issue may include, but are not limited to:

- Computational modelling
- Numerical simulation
- Finite Elements
- Stabilization methods
- Thermomechanical formulations
- Material properties
- Metallurgical characterization
- Numerical methods
- Industrial applications
- Additive Manufacturing (AM) processes
- Friction Stir Welding (FSW) processes
- Casting processes
- Rolling processes
- Sheet Metal Forming (SMF) processes

Guest Editors

Prof. Dr. Carlos Agelet de Saracibar

Prof. Dr. Eric Feulvarch

Prof. Dr. Jean-Philippe Ponthot

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
