## **Special Issue**

## Thermally-Assisted and Mechanical Machining of Metals and Alloys

#### Message from the Guest Editors

In industries, lasers are employed for a variety of material processing methods, including welding, surface hardening, rapid prototyping, and machining. Laserassisted machining is an effective process to facilitate material removal processes for various materials. In this Special Issue, we aim to collect a set of contributions in the referred fields, which include but are not limited to:

- Laser-assisted machining: grinding, drilling, turning, milling, turn-mill process;
- Material behavior and influence of thermal effect;
- Optimization of process parameters;
- Design and development of innovative equipment, tools, and systems;
- Cutting tool wear, tool life, and a novel cutting tool design.

Research and review papers addressing all aspects of laser-assisted machining are welcome. Articles focusing on material processing, as well as design and development of equipment and cutting tools, are also encouraged. We hope that the present Special Issue will be an opportunity to create a network between authors and other researchers working in the area of laserassisted machining.

## About the Journal

### Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### Editors-in-Chief

#### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

#### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

### Author Benefits

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
