

Special Issue

Magnetic Shape Memory Alloys

Message from the Guest Editors

Magnetic shape memory alloy is a kind of very important shape memory alloy, which has been well developed in the past twenty years. The research on this topic focused on magnetic field induced strain, giant magnetoresistance, magnetocaloric effect and elastocaloric effect, as well as the preparation method, improvement of smart property and material characterization related to magnetic shape memory alloy. Therefore, this is also the topic of the Special Issue. Papers in this scope or concerning the physical and mechanical properties of magnetic shape memory alloy are favourably received in this issue.

About the Journal

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editor-in-Chief

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering,
State Key Laboratory for Advanced Metals and Materials, University of
Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083,
China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei
Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.7 days after
submission; acceptance to publication is undertaken in 2.7
days (median values for papers published in this journal in
the second half of 2025).
