

Special Issue

Metal and Metal-Oxide Film Deposition

Message from the Guest Editors

This Special Issue invites most recent and advanced approaches in the area of nanostructured materials, where our focus is, in particular, on metal and metal-oxide films. Novel approaches of nanostructured materials related to fabrication, characterization methods, properties, underlying physics, numerical investigations or new applications are of interest to this Special Issue creating a platform for discussion and new thoughts in this important area. Metal and metal-oxide film deposition is of interest and applied across industries. Examples of active scientific work are thin-film metamaterials with unique properties, coatings with superior protecting properties, new sensing materials, or advanced multilayers, to name a few. Hence, we are inviting authors to report and discuss their newest findings in material science, engineering, biological and medical sciences, and physics.

Guest Editors

Prof. Dr. Marcus P. Rutner

Institute for Metal and Composite Structures, Hamburg University of Technology, Denickestr. 17, 21073 Hamburg, Germany

Dr. Michael Störmer

Helmholtz-Zentrum Geesthacht, Centre for Materials and Coastal Research, Max-Planck-Strasse 1, 21502 Geesthacht, Germany

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
