

Special Issue

Processing and Characterization of Metal Containing Wastes

Message from the Guest Editor

This Special Issue aims to address research on processes of metal recovery from wastes containing metals. Recycling processes, the use of physical and mechanical technologies, and chemical processes involving low or high temperatures are all of interest. Presentation of research on the inertization of hazardous wastes or similar processes is encouraged as well. This Issue also intends to include the presentation of studies on the characterization of wastes containing metals, not only to support the development of extraction, recycling, or inertization processes but also to further environmental and hazard assessments.

Guest Editor

Prof. Dr. Fernando Castro

Department of Mechanical Engineering, Universidade do Minho, 4800-058 Guimarães, Portugal

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
