

Special Issue

Metallic Materials under Dynamic Loading

Message from the Guest Editors

The aim of this Special Issue is to publish scientific papers related to dynamic behavior of materials, and also to structure (Impact, explosion, perforation, spalling, etc.). For this purpose, the Special Issue will consist of works related to experimental approaches, modeling, in terms of constitutive relations and computing simulations coupled to experiments. The materials studied will be related to metals, allowing a better understanding of the macroscopic behavior of materials subjected, for example, to large deformation, high strain rates, high temperatures, shock and high pressures. In addition to material behavior, works and papers regarding fracture and damage under extreme conditions (described previously) will be considered. I hope to receive many propositions to make a high-impact Special Issue on “Dynamic Behavior of Materials and Structures”. I am sure that this Special Issue will be useful for people working in this specific field, and also for PhD students. It will cover experiments, modeling and computing.

Guest Editors

Prof. Dr. Alexis Rusinek

LEM3 - Laboratory of Microstructure Studies and Mechanics of Materials, UMR-CNRS 7239, Lorraine University, 7 rue Félix Savart, BP 15082, CEDEX 03, 57073 Metz, France

Dr. Eng. Piotr W. Sielicki

Poznan University of Technology, Faculty of Civil and Environmental Engineering, Institute of Structural Engineering, M.Skłodowskiej-Curie 5, 60-965 Poznan, Poland

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
