

Special Issue

State-of-the-Art Metallic Materials and Metallurgy in Germany

Message from the Guest Editors

With the current amendment to the Climate Protection Act, the German government has tightened climate protection targets and set the goal of achieving greenhouse gas neutrality by 2045. In order to reduce CO₂ emissions by 65 percent by 2030 compared with 1990 levels, a billion-euro program has been launched to help decarbonize industry, among other things. Energy-intensive industries in metal production and processing are particularly affected, with the result that they are facing a comprehensive and irreversible transformation in order to achieve the climate targets set. The focus of this Special Issue is therefore on contributions to the state-of-the-art and the transformation of metallurgy and processing of metallic materials in Germany, considering the aspects of decarbonization and recyclability.

Guest Editors

Prof. Dr. Axel von Hehl

Head of Chair of Materials Science and Testing, Institute for Materials Engineering, University of Siegen, Paul-Bonatz-Straße 9-11, 57076 Siegen, Germany

Prof. Dr. Rainer Fechte-Heinen

Department of Materials Science, Leibniz Institute for Materials Engineering - IWT, Badgasteiner Str. 3, 28359 Bremen, Germany

About the Journal

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editor-in-Chief

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering,
State Key Laboratory for Advanced Metals and Materials, University of
Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083,
China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
