

Special Issue

Optimizing Techniques and Understanding in Casting Processes

Message from the Guest Editors

The present issue has been intended to show the most recent advances and developments in casting technologies which can be applied in foundry plants to manufacture cast alloys parts. Such improved methods must be oriented to solve problems in the casting processes, make them simpler and better controlled than the usual ones and/or to develop new processes which improve the properties of the resulting alloys and reduce the costs.

- Foundry process
- cast iron
- cast aluminium
- melting
- melt treatment
- pouring
- melt additions
- mechanical properties
- casting technology
- data acquisition
- artificial intelligence
- finishing
- simulation
- filling system
- feeding system
- foundry cost

About the Journal

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
