

Special Issue

Optimization and Analysis of Metal Cutting Processes

Message from the Guest Editors

At present, metal cutting processes are in constant development concerning both the analysis of physical phenomena in machining processes and the ways to optimize these processes for application in various machining techniques (both macro and micro machining). This special issue focuses on the high quality research papers devoted to subtractive manufacturing methods (or cutting processes). We would like to kindly invite all researchers interested in widely understood machining process research to present their results in papers related to both experimental and theoretical studies. This will allow to create a joint study of researchers on subtractive manufacturing methods useful for further work in the field of understanding and developing this area of science.

Guest Editors

Dr. Tadeusz Mikolajczyk
Danil Yurievich Pimenov

About the Journal

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editor-in-Chief

State Key Laboratory for Advanced Metals and Materials, University of
Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083,
China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei
Compendex, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.7 days after
submission; acceptance to publication is undertaken in 2.7
days (median values for papers published in this journal in
the second half of 2025).
