

Special Issue

Sustainability for Extraction and Recovery of Precious, Strategic and Rare Earth Metals

Message from the Guest Editors

Hydrometallurgical processes for the extraction and recovery of metals are highly topical issues not only because of the advantages of the hydrometallurgical process itself but also because of their advantages in the treatment of complex ores, lower rate of contaminating residues, proportionally lower cost, and versatility for treating new ores of different strategic minerals. Therefore, the Special Issue will be dedicated to the collection of articles on recent advances in the recovery of metals from various sources of raw materials, as well as the recovery of metals by means of different extractive metallurgical processes, and the synthesis of compounds and solid solutions from hydrometallurgical processes. The articles must deal with innovative results of a scientific or industrial nature and, in particular, should relate to precious, strategic, and rare earth metals.

About the Journal

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editor-in-Chief

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering,
State Key Laboratory for Advanced Metals and Materials, University of
Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083,
China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei
Compendex, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) /
CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 18.7 days after
submission; acceptance to publication is undertaken in 2.7
days (median values for papers published in this journal in
the second half of 2025).
