Special Issue

Developments on Sustainable Hydrometallurgical Methods

Message from the Guest Editors

Hydrometallurgical methods have been developed for metal smelting and recycling valuable metals from solid waste. This Special Issue focuses on advances in such hydrometallurgical methods in all processing steps with final property analysis. Since their inception, hydrometallurgical techniques have exhibited excellent performance in selectively recovering target metals. Nowadays, the higher recovering rate of metals with more green and sustainable methods demands more advanced hydrometallurgical techniques. We welcome articles that focus on innovative and sustainable hydrometallurgical methods for recovering metals and other valuable elements. Fully controllable fast and lowcost processes are of particular interest, especially those with a higher recovering rate in complicated industrial process.

About the Journal

Message from the Editor-in-Chief

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Editor-in-Chief

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
