Special Issue

Microarrays in Immunology Research

Message from the Guest Editor

The total number of unique antibodies circulating in our blood, protecting us from infection is around 108. There are 25 million to a billion unique T-cells. Microarrays have evolved over the last decade into a useful tool for looking at large numbers of biomolecules simultaneously, even in the millions. We will present a broad collection of immunological studies that could not have been possible without the technology of microarrays.

Guest Editor

Prof. Dr. Phillip Stafford

Center for Innovations in Medicine, The Biodesign Institute, Arizona State University, 1001 S. McAllister Ave., Tempe, USA

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Massimo Negrini
Department of Morphology, Surgery and Experimental Medicine,
University of Ferrara, Ferrara, Italy

Author Benefits

Rapid publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28 days after submission; acceptance to publication is undertaken in 8 days (median values for papers published in this journal in 2016).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
