

## **$\mu$ -TAS: A Themed Issue in Honor of Professor Andreas Manz**

Guest Editors:

**Prof. Dr. Wenming Wu**

**Prof. Dr. Yanyi Huang**

**Prof. Dr. Yonggang Zhu**

**Prof. Dr. Pavel Neuzil**

Deadline for manuscript  
submissions:

**closed (29 February 2024)**

### **Message from the Guest Editors**

Dear Colleagues,

This Special Issue aims to recognize the contributions of Professor Andreas Manz in the field of Miniature Total Analytical Systems ( $\mu$ -TAS). It will cover a selection of recent studies and review articles about  $\mu$ -TAS theory and its development and sensing applications. Professor Andreas Manz, one of the pioneers in microchip technology used for chemical applications, is generally considered as the founding father of the “lab-on-a-chip” field. He developed the novel concept of  $\mu$ -TAS in 1990, which allows complex medical, biological or chemical analyses to be performed quickly and efficiently on a platform no larger than a few square millimeters.

$\mu$ -TAS, defined as “a system that periodically performs all sample handing steps required to translate chemical into electronic information at a location that is extremely close to the point of sample collection”, has extended its usefulness into many new fields and disciplines spanning basic research to commercial applications.

## Editor-in-Chief

## Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

**Journal Rank:** JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)
