Message from the Guest Editor

Dear Colleagues,

The innovation in nanomaterials in several forms, structures, compositions, and applications has seen exponential growth over the past 10 years, and has been gaining more confidence in industry for the design and fabrication of biomedical devices that can be used as drug delivery systems, tissue engineering, and bioelectronic devices such as biosensors or organic solar cells. Accordingly, this Special Issue seeks to showcase research papers and review articles that focus on novel methodological developments in nano-scale fabrication, novel synthesis processes, chemical compositions, nanostructures, coatings, or bioactivity and tissue response in the fields of the application of tissue engineering, drug delivery systems, and biomedical devices:

- nanomaterials
- biodevices
- tissue engineering
- drug delivery systems
- biosensors
- nanotechnology

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q2 (*Mechanical Engineering*)
