Special Issue

3D Printing of MEMS Technology, Volume II

Message from the Guest Editor

3D printing is currently an emerging technology. While it was mostly used for rapid prototyping previously, this technology has long entered rapid production, especially for complicated objects or small lot sizes. Most recently, new 3D printing technologies have emerged that enable the smallest features, at the micro- or even nano-scale, to be printed. At the same time, well-known problems, such as the waviness of fused deposition modeling (FDM) printed parts, the missing long-term stability of some typical printing materials, or the reduced mechanical properties of 3D-printed objects, still exist. The first Special Issue focussing on 3D printing of MEMS technology contains studies on various 3D printing techniques, underlining the possibilities provided by recent technologies. We now welcome the most recent developments in this interdisciplinary research area for the second volume.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen
Queensland Quantum and Advanced Technologies Research Institute, Griffith University, West Creek Road, Nathan, QLD 4111, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
