

Special Issue

Laser Micro/Nano-Fabrication, 2nd Edition

Message from the Guest Editors

Laser micro/nano-fabrication has a wide range of applications in subtractive machining, such as precision cutting and engraving related to laser ablation and melting; additive machining, such as laser-induced chemical deposition and micro-cladding related mainly to laser-melted and -induced chemical reactions; and laser welding and forming based on the heating effect. In this Special Issue, we will study the interaction of a laser with materials during micro/nano-fabrication for better control and its application in different systems and processes. This Special Issue's scope includes, but is not limited to, the following: the heat-affected zone during laser processing; microstructure change under laser and machining effects; process control of the laser for better material removal rate, tool life, surface finish, and/or residual stress; and the scale effect during laser micro/nano-fabrication. We look forward to receiving your valuable contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen

Griffith University, West Creek Road, Nathan, QLD 4111, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
