# **Special Issue**

# Microfluidic Devices for Biosensing, 2nd Edition

## Message from the Guest Editors

We cordially invite you to submit a paper to this Special Issue of *Micromachines*, entitled "Microfluidic Devices for Biosensing." Microfluidics is a vast field with numerous applications for the science and technology underpinning it. Regardless of the application, they all need the manipulation of micro- to picoliters of fluid. This has been particularly important in the field of sensors, and more specifically in biosensors and biodetection, which have incorporated microfluidics as an essential component in the development of lab-on-achip, point-of-care (POC), and organ-on-a-chip concepts. This Special Issue aims to cover all aspects of the fabrication of microfluidic-based devices using a variety of technologies, ranging from conventional PDMS or paper-based devices to more modern additive manufacturing technologies for biosensing applications. This Special Issue focuses on biodetection and biosensor applications, as well as related areas for the development of a new generation of microfluidic devices, such as valves, cryogeny, micro- and nanodroplet generation, computing, etc.

# **About the Journal**

# Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

#### Editor-in-Chief

Prof. Dr. Ai-Qun Liu

Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China

#### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

# **Journal Rank:**

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
