

Special Issue

Advanced Biomanufacturing for Biomedical Engineering Applications, 2nd Edition

Message from the Guest Editor

Advanced biomanufacturing, along with biomaterials and cell/stem cell technology, has shown great promise for engineering highly tunable tissue analogues to address significant challenges in biomedical engineering. This Special Issue aims to collect high-quality original and review articles on the development/creation of cutting-edge engineering technologies, artificial constructs, and devices for broad applications in biomedical engineering and to explore the most important questions in the field. The topics include, but are not limited to, advanced biomanufacturing, 3D printing and bioprinting, biomaterials and bioinks, biomanufactured constructs/devices for regenerative medicine, disease modeling, and drug screening, as well as advanced imaging methods/technologies to non-invasively track biomanufactured structures in living animal models and/or human patients.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen

Queensland Quantum and Advanced Technologies Research Institute,
Griffith University, West Creek Road, Nathan, QLD 4111, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
