

Special Issue

Flexible and Hybrid Flexible Organic Chemical and Biosensor Systems

Message from the Guest Editor

The world of organic sensors has evolved with the sustained research and discovery of novel pristine and composite organic conductors, semiconductors, and dielectrics. This has led to an influx in technological advancements in discrete as well as integrated sensory systems built solely, or predominantly, out of such soft materials. Many of the reported works in this domain have focused on biosensing, chemical sensing, and wearables for health-monitoring applications. In the past decade, these technologies have scientifically matured to a level where they have been effectively demonstrated in flexible and hybrid flexible forms with integrated sample handling and signal analysis, propelling them towards real-world implementations. This Special Issue will include papers and review papers which showcase the various emerging techniques implemented in flexible and hybrid flexible organic chemical and biosensor systems.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
