

## Special Issue

# Advanced Micro/Nano Biodegradable Sensors

### Message from the Guest Editor

Recent advances in biodegradable sensors introduced unusual classes of electronic devices, which dissolve, disintegrate, or otherwise physically or chemically decompose in a designed period without harmful residue. This biodegradable technology may enable eco-electronics that minimize electronic wastes or provide a new class of implantable bio-sensors that are able to temporarily monitor bio-activity in the body. Such types of biodegradable sensors can eliminate secondary surgery to remove it after medical treatments. For this Special Issue, you are invited to submit contributions describing the development in the broad area of biodegradable sensors, ranging from nanoscale to macroscale in dimensions. The scope covers dissolution chemistry, materials processing, sensor structure, design strategy, and bio-compatibility for potential applications of biodegradable electronics.

### Guest Editor

Dr. Jahyun Koo

School of Biomedical Engineering, Korea University, 145 Anam-ro, Seongbuk-gu, Seoul 02841, Korea

### Deadline for manuscript submissions

closed (20 September 2021)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
