# Blood Flow in Microfluidic Medical Devices

# Message from the Guest Editors

Many microfluidic-based medical devices contact blood to diagnose or treat diseases. Therefore, it is critical to understand the hemodynamics within microchannels and the technical challenges that device developers and manufacturers face on the path to commercialization. This Special Issue intends to discuss common flowrelated concepts and challenges occurring in microfluidics with biomedical applications. We welcome papers on biomedical topics such as interactions between blood and microfluidic materials, computational fluid dynamics modeling of non-Newtonian flow in microchannels, sample loading, microfluidic pumping and mixing, cell isolation and separation in microchannels, active and passive forces to manipulate blood flow, blood element damage. clotting, microscale leakage testing, bubble formation, transport and filtering of blood using microfluidics, plugand-play platforms for blood sample analysis, preclinical or clinical studies involving microfluidic systems, sensing techniques, hemocompatibility studies in microchannels, and device failure modes.

# About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

### Editor-in-Chief

Prof. Dr. Ai-Qun Liu

 Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

### Author Benefits

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
