Special Issue

Wireless Power Transfer Systems for Biomedical Devices

Message from the Guest Editors

Wireless power transfer (WPT) technology has recently emerged as an alternative source of batteries and wired power supply for biomedical devices such as pacemakers, retinal implants and neurostimulators. However, the power requirement of some of these devices is a major challenge. This Special Issue aims to present novel findings on design analysis and implementation of WPT for biomedical devices. This Special Issue is focused on, but not limited to, the following topics: Theoretical analysis of WPT techniques for biomedical devices;
Necessary electromagnetic theory;
Design and implementation of WPT coils and antennas;
Measurement and safety analysis of WPT for biomedical application;
Power management electronics for WPT;
Simulation of WPT for biomedical devices;
WPT efficiency analysis;
Power electronics and batteries;
Near field, mid field and far field;
Wireless data transfer;
Tissue safety analysis;
Energy harvesting;
Antenna and wave propagation;
RFID.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen
Queensland Quantum and Advanced Technologies Research Institute, Griffith University, West Creek Road, Nathan, QLD 4111, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
