

## Special Issue

# Electronic Textiles and Wearable Technology

### Message from the Guest Editor

Electronic textiles, or e-textiles, have started to cross over from idea to reality in recent years, but are still at an early stage of development. Though efforts to embed electronics into clothing began as early as the beginning of the 20th century, it is only in the past two decades that advancements in material and manufacturing techniques have made the production of commercial e-textile products possible. Products, such as those for tracking physical activity and sports performance, have not yet seen widespread adoption but are growing in number. This Special Issue seeks to bring together papers of all areas relevant to electronic textiles and wearable electronics. These include but are not limited to novel sensors, actuators, displays, wireless communications, and batteries that are specifically designed for wearable applications. We particularly welcome contributions relevant to the research in medical areas that would provide step-changing treatments to the most difficult and challenging issues. Review articles, original research papers, and short letters are solicited.

### Guest Editor

Dr. Yang Wei

Smart Wearable Research Group, Department of Engineering,  
Nottingham Trent University, Nottingham, UK

### Deadline for manuscript submissions

closed (30 June 2022)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
