

Special Issue

Hardware-Friendly Machine Learning and Its Applications

Message from the Guest Editor

This Special Issue aims to explore the potential of efficient machine learning, reveal emerging algorithms and design needs, and promote novel applications. It will also collect contributions on the advancement of methodologies and technologies for the design, evaluation, and optimization of software, hardware, and emerging applications representing the current solution to support the diverse computing scenarios in which machine learning is exploited. Topics of interest include, but are not limited to, the following:

- New microarchitecture designs of hardware accelerators for ML;
- Sparse learning, feature extraction, and personalization;
- Deep learning with high speed and high power efficiency;
- Computing models and hardware architecture co-design for machine learning;
- New microarchitecture designs of hardware accelerators using emerging devices;
- Tools for the modeling, simulation, and synthesis of hardware accelerators
- ML acceleration for edge computing and IoT.

Guest Editor

Dr. Arman Roohi

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
