

Special Issue

The Future of Microsystems for Smart Cities

Message from the Guest Editors

This Special Issue will focus on technological strategies to convert advanced cities into “smart cities”, based on the many possible innovative usages of microelectronics, nanotechnologies, Artificial Intelligence (AI), machine learning, deep learning, Internet of Things (IoT) and network infrastructures applications. The topics will focus on but not be limited to:

- Microelectronics for smart machines;
- Modern electrical microsystems;
- Advanced mechanical microsystems;
- Mechatronics microsystem design;
- Smart miniaturized sensors for fault diagnostics;
- Power microsystems;
- Smart grid management and energy control microsystems;
- Intelligent biomedical microsystems;
- Micromachines for healthcare;
- Micromachines for smart water management;
- Microsystems for intelligent transportation in smart cities;
- Micromachines for communication systems.

Guest Editors

Prof. Dr. Adam Glowacz

Prof. Dr. Jose Alfonso Antonino-Daviu

Dr. Zhixiong Li

Dr. Muhammad Irfan

Dr. Wahyu Caesarendra

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
