Special Issue

Organic Electronic-Based Devices for Biomedical Applications

Message from the Guest Editor

The field of organic electronics encompasses a range of innovative technologies, including flexible, stretchable, and fabric-based or transparent and free-form electronics. These advancements open new possibilities for wearable and implantable applications, such as health-monitoring sensors, electroceuticals, and optogenetic devices, capabilities which traditional inorganic electronics struggle to achieve. To bring these wearable organic electronic solutions to fruition, interdisciplinary research is essential, integrating expertise from electronics, engineering, chemistry, physics, and materials science. In light of these developments, we invite high-quality submissions for this Special Issue focused on significant scientific and technical contributions in the realm of organic electronics for biomedical applications. For more informtaion about this specail issue, please visit the website. We look forward to your valuable contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen
Queensland Quantum and Advanced Technologies Research Institute, Griffith University, West Creek Road, Nathan, QLD 4111, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
