

Special Issue

Selected Papers from 2019 International Conference on Micro/Nanomachines

Message from the Guest Editors

Micro/nanomachines can move automatically and perform complicated tasks. Their wide application is sure to bring about revolutionary changes in many fields, such as biomedicine, micro/nanoengineering, environmental monitoring and remediation, food safety, and social security. To further promote corresponding exploration and application, the 2019 International Conference on Micro/Nanomachines (icnmn.org/) is to be held in Harbin, China, 25–28 August 2019. This conference will focus on “Propulsion at Micro/nanoscale”, which includes but is not limited to:

- Micro/nanomotors (active colloids);
- Molecular and DNA machines;
- Micro/nano sensors;
- Micro/nanoactuators; and
- Micro/nano robotics.

Papers attracting the most interest at the conference, or those that provide novel contributions, will be selected for publication in this Special Issue of *Micromachines*. We hope that this Special Issue benefits the efficient sharing of the latest significant results and inspired viewpoints on an international scale, and thus propels the research on micro- and nanomotors across the globe.

Guest Editors

Prof. Dr. Joseph Wang

Prof. Dr. Longqiu Li

Prof. Dr. Yongfeng Mei

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Nam-Trung Nguyen

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
