

Special Issue

Nanomaterials Photonics

Message from the Guest Editors

Nowadays, optics, photonics, optoelectronics, and the technologies that have been developed from them permeate many different aspects of modern life. The impact of the continuing research in these areas, including emerging applications in areas such as energy, biotechnology, and medical sciences, where they are providing new imaging techniques, diagnostic procedures, and therapies, is constantly growing. Part of this ever-widening impact has been made possible by the development of novel nanomaterials, allowing the implementation of new functionalities, making the research in the field of photonic nanomaterials a very dynamic one. For this reason, we have set to produce a Special Issue to provide a forum to disseminate and share research efforts focused on this area, which can include different topics such as material development, energy harvesting devices, imaging, and theranostics systems based on nanomaterials, and all the other research fields that can be included under this broad designation. We look forward to receiving your contributions!

Guest Editors

Dr. Raul Rangel-Rojo
Prof. Dr. Luciana R. P. Kassab
Dr. Tiziana Cesca

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
