Special Issue

Biomedical Microdevices: State of the Art and Trends

Message from the Guest Editors

Biomedical microdevices are broadly defined as the integration of electrochemical/mechanical systems with molecular/biological methods, with applications in environmental and health sectors and, subsequently, with high impact on society and business segments. In recent decades, miniaturization has undergone a resounding evolution, conferring versatility and simplicity to the systems along with time-to-result and cost-per-test savings. The development of new materials and fabrication and integration of different techniques have been enabling new and innovative approaches. This Special Issue seeks to showcase research papers, short communications, and review articles that focus on the state of the art and new trends of biomedical devices. We welcome manuscripts based on all aspects of biomedical microfluidic devices, including, but not exclusively, novel designs, nanomaterials and nanotechnology, nucleic acid analysis, cellular and molecular detection, cell enrichment, drug delivery, proteins, tissue and organ on chip, lab-on-a-chip, and point-of-care diagnostics.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Ai-Qun Liu
Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
